

CHARLES GOODLUCK EWODODHE

SOFTWARE ENGINEER — WEB & MOBILE APPLICATIONS

charlesgoodlucke@gmail.com | [Website](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience designing and delivering high-performance, accessible web and mobile applications and scalable backend systems for startup and high-growth environments. Proven track record leading cross-functional product initiatives spanning frontend systems, backend services, and operational tooling for platforms serving large number of user interactions and high-volume transactions. Skilled in end-to-end feature development, improving onboarding flows, system reliability, and operational efficiency while driving measurable gains in user experience and business outcomes.

CORE COMPETENCIES

Languages: Dart, JavaScript, TypeScript, HTML5, CSS3/Sass, PHP, C#, Java, SQL

Frontend & Mobile: Flutter, React, Next.js, Vue.js, Tailwind CSS, Styled Components, Webpack

Backend & APIs: Node.js, REST APIs, WebSockets, Authentication & Authorization

Cloud & DevOps: CI/CD (GitHub Actions), Vercel

Data & Infrastructure: PostgreSQL, MySQL, Firebase, Supabase

Practices & Tools: Agile/Scrum, System Design, Web Accessibility (WCAG), Performance Optimization, Git/GitHub, Figma

PROFESSIONAL EXPERIENCE

Software Engineer, Serviceman Limited – Peterborough, UK | Remote Oct 2025 – Present

- Drove end-to-end delivery of customer-facing features across web and mobile, architecting scalable frontend and backend systems.
- Directed cross-functional initiatives across engineering, product, and design to redesign user onboarding flows, reducing time-to-first-value by 35% and improving activation rates across web and mobile.
- Improved system reliability and operational efficiency by introducing automated CI/CD pipelines and monitoring practices, cutting production incident response time by 40% and deployment failures by over 50%.
- Mentored and provided technical leadership to a team of engineers, establishing coding standards, accessibility checklists, and architecture review processes adopted by the company.
- Collaborated with developers and stakeholders to improve product functionality and usability.
- Participated in product planning and feature implementation.

Software Engineer / UI Engineer, Talentic Tech Hub – Kaduna, Nigeria | Hybrid Sept 2020 – Oct 2025

- Developed modern interfaces for web and mobile applications.
- Worked closely with engineering teams to translate business requirement into software solutions.
- Designed scalable component libraries and reusable UI systems.
- Improved usability and consistency across multiple digital products.
- Collaborated within distributed international teams using Agile workflows.

Web Developer & UI Designer, CondSoft Solutions – Kaduna, Nigeria | On-Site Nov 2017 – Sept 2020

- Built responsive websites for business clients.
- Developed landing pages focused on usability and performance.
- Worked with clients to transform business ideas into digital solutions.

EDUCATION

Bachelor of Science in Computer Science

Kaduna State University | 2020

DNIIT in Software Engineering

National Institute of Information Technology | 2017

SELECTED PROJECTS

- **Handyman Marketplace** — Flutter | Firebase | REST APIs
Built a cross-platform marketplace connecting customers with skilled professionals.
Implemented authentication, booking workflows, push notifications, and location-based features.
Designed a scalable architecture for future growth.
- **Errand Service Marketplace** — Flutter | Firebase
Developed a complete ecosystem for runners providing errand services to customers.
Implemented booking management, user authentication, notifications, and backend integration.
Focused on performance, usability, and maintainability.
